Make Science Make Sense

*and have your article published
in the Centralian Advocate*

Science is changing our world daily, yet many ordinary people might tell you that they just don't understand what it's all about. Being a good science communicator means you are able to take the ideas of science and write about them in a way that makes sense to any one. Sir David Attenborough and Dr Karl have truly mastered this art. Can you illustrate the magic and importance of science like they can?

ENTRIES CLOSE 15 JULY 2005

Writers Guidelines are available from:
